Clean Seed CX-6 Commercial Launch Ceremony Held at WS Steel

Steinbach, MB – Clean Seed Capital Group in conjunction with WS Steel, rolled out the first production CX-6 SMART Seeder™ off the assembly line on April 5th, 2016. A capacity crowd of local business people, industry leaders, members of the farming community, dignitaries, and many employees from both Clean Seed and WS Steel were on hand to celebrate the commercialization of the award winning technology.

The event featured the opportunity for attendees to take a closer look at the revolutionary seeder, with technical and engineering staff on hand to answer any questions. Presentations were made by Joe Walder, President of WS Steel, Graeme Lempriere, President and CEO of Clean Seed Capital, and government officials representing all three levels of government. Groups were also given the opportunity to tour through the production facility and learn more about the manufacturing process behind the SMART Seeder™.

While the Manitoba weather turned to heavy snow, it did not hamper the enthusiasm and spirits of those who witnessed the event – this unwavering support was powerful motivation to all who dedicated themselves to this effort.

Jim Wood, VP Agriculture for Rocky Mountain Equipment stated: “It was fantastic to see the first CX-6 SMART Seeder™ completed and set for the 2016 planting season. The team at RME is excited to put it in the hands of our producers and show all it has to offer”.

Ted Falk, Member of Parliament of Provencher shared, “This will bring significant change to the way cropping is done not only in Canada but right across North America, and I suspect right across the world. Congratulations to the Clean Seed and WS Family on a job well done”.
